ISP CET (central earth termination gland) earthing system is for the termination and bonding of SWA cables in tight confined spaces which are usually found in street lighting and the traffic industry.,  
 These are available in 3 different sizes which offer a very strong and simple design.

ISP CET Glands is a well established product within the U.K. and has been used for many years by various major companies.

- Manufactured in Nickel & Tin plated solid brass.
- Easy to use
- Simple and strong design
- Modifications can be made to tailor individual requirements
