Tidi-Hooks® are simple easy to use cable hooks for walls and ceilings. They're highly visible and are a quick solution to trailing cables in any work place. Tidi-Hooks® can be used at high level along corridors and walk ways and run cables from one to the next. This keeps them off the floor and completely removes the risk of people tripping over them.

The hooks on Tidi-Hooks® are designed so that they can also be used on ceilings aswell as walls. The image below was taken from a project in London where they are using Tidi-Hooks® all over the site to keep 110v cables out of harms way.

Because they can also be used on ceilings, some customers have started using them as a permanent alternative to cable trays.

Each cable hook for walls can hold up to 10 kilograms of weight and with an internal diameter of 2.5 centimetres, you can easily fit 15 x 110 volt arctic cables. They can also fit larger power cables and hoses if required.

We stock this cable hooks for walls and ceilings in highly visible orange, with any colour available upon request. Why not make your site safer with Tidi-Hooks® in your company colours?

All of our products are made in the UK from the best components and using them will ensure that you're taking the reasonable steps to keep your site staff safe.
